

Technical Data Sheet

RMK Fount

Description

Highly Concentrated one step fountain solution for Ryobi, Mitsubishi, Komori and similarly dampened printing presses.

Dosing

Use 1.5-2.5 % (1.9 -3.0 ounces) of Fountain Solution per gallon of water.

Benefits

Works with all Printing Plates

Works with all inks including LED, H-UV, UV, EB, Conventional, etc.

Large amount of decalcifier to prevent ink roller stripping and calcium deposits.

Efficiently delivers water to ink, creating very stable ink water balance with very small film on plate surface.

Low Conductivity (approximately 450uS per ounce)

Creates Vibrant and Stable color throughout short and long run jobs.
