

Technical Data Sheet

DECAL - Fount Decalcifier

Description

This proven and highly effective fount decalcifier contains a highly effective chelator of Calcium Carbonate. It reacts quickly and effectively with Calcium Carbonate to keep it solubilized in water and prevent it from building up on rollers, blankets, plates etc. Greatly reduces the risk of Roller Stripping and Glazing problems. This product also provides additional pH buffering capacity which greatly improves ink/water stability over long runs and overall print quality.

Dosing & Directions

Dilute 0.5 to 1.25 ounces per gallon of premixed fountain solution. (0.5%-1.0%)

Benefits

Drastically reduces Stripping and Glazing issues.

Removes calcium from water system.

Prevents Calcium Carbonate deposits.

Stabilizes pH and increases buffering capacity for high calcium stocks and long runs.

Improves color stability and over all print quality.

Available in 4 x 1-gallon cases.
