

## Power House Systems Cleaner

### ***Do You Send Too Much Down the Drain?***

#### Old Way—Competitors'

#### New Way—Power House

**Our STEP 1** is a strong cleaner which cleans out the entire system. It comes as a powder, just add hot water, mix by inversion, and pour it into the dirty tank.

**Our STEP 2** is a neutralizer, decalcifier, and biocide which removes all calcium, paper dust, bugs, etc., and leaves the system at a pH of 4.3, ideal for most fountain solutions to start at.

### ***Save Time, Money, Waste and Hassles***

- Minimal shipping cost because it is very light weight, concentrated, and contains no water.
- Powerfully cleans ink, dirt, grime, algae, and other contaminants
- Removes calcium throughout the system
- Takes half the time of other systems cleaners
- Significantly reduces the amount of rinse water that has to be disposed
- Buffers the system completely and perfectly for fresh fount
